

COVID 19 Press Release

With the COVID-19 outbreak, Woodford County EMS remains fully staffed and is responding to all calls for assistants. We have worked with our local 911 call center to develop a screening process for all our 911 calls to help the crews prepare for any call that meets the COVID-19 check list. This process does not delay our crews from responding to the call because this process takes place while the crew is enroute to the call. All of our EMS staff and all first responders are trained and equipped to handle all emergency that they are faced with.

We are working closely with our local government leaders, the Woodford County Health Department and Woodford County Emergency Management to help put plans in place to keep our Community safe.

As of March 19<sup>th</sup>, Cassie Prather, the Public Health Director, confirmed there are no cases of COVID-19 in Woodford County. We will continue to provide the highest level of care to our community. With your support we will make it through these tough times while keeping all of us safe.

Freeman Bailey

Director of Woodford County EMS
